

# NATURAL GRASS MAT WEAVING MACHINE

## R-70

### HIGH SPEED WEAVING MACHINE FOR JAPANESE MATTING

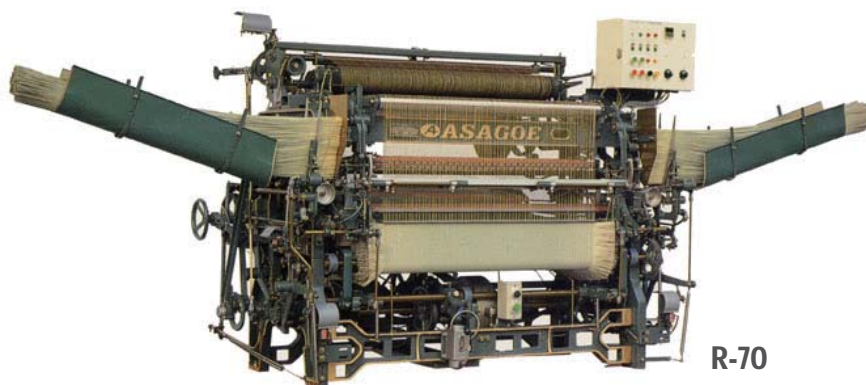

World Leader of 21st Century! 50% more productivity!

Equipment for double beam fittable equipment for product's weight automatic setting automatic thickness adjustable device fittable.

## R-70

### Features

- *High efficiency.*  
50% more productivity than past model.
- *201 Warping thread is employed to realise HIGH-GRADE and BEAUTIFUL surface. also 136 warping thread is available. New guide hook for 201 thread has special form to save strain by injection, improve stabilisation and weave beautiful surface*
- *Driving device.*  
Machine and rolling device have individual monitor. Flexible revolution setting by each inverter dial meters. Easy view of revolution by digital indicator. Simple operation. By button operation
- *Misfeed preventing mechanis.*  
Static electric capacity is employed for sensor. Employ needle stand-by control to save material demolishment.
- *Automatic thickness adjustment device.*  
Famous Roll Feeding type as standard Automatic product weight setting device as option(Photo)
- *CAMs*  
All cams' surface for main mechanism are hardened long life operation.
- *Integrated Lubrication system*  
Lubricant supplies from integrated pump.

R-70

Model	R-70
Dimensions	3,850mmL × 1,250mmW × 1,300mmH
Weight	650kg
Speed	180rpm
Capacity	Main 3 Phase 200ACV,400W with brake
	Roll 3 Phase 200ACV,100W
